## Hazards of Feeding Wildlife in Urban Areas

The Town of Oromocto does not encourage the feeding of wildlife. This practice almost always carries with it negative consequences for the wildlife involved. These include increased disease transmission and increased mortality due to vehicle collisions.

There are also a number of safety and social concerns for the public, such as the potential increase in vehicle collisions, as well as damage to property and nuisance problems.

Although people who feed wildlife do so with the best of intentions and feel they are looking after the welfare of the wild animals, they should be aware that wildlife should remain wild. Wildlife should derive their food and shelter from natural habitats and under natural conditions. This will help maintain natural adaptations that ensure the long-term survival of the animals themselves, and of the species.

**For more information of this topic, please see the Town of Oromocto website**  
<http://www.oromocto.ca/page/widepage/By-Laws>  
**Animal Control 417 A.**

*The general rule is: "Do not feed wildlife."*
