Permit No _____					

- The Town of Oromocto By-Law 315 prohibits all open burning within Town Limits. However, the Town has taken “case by case” exceptions to this by-law as it relates to the use of “outdoor fireplaces” for recreational purposes on private land. Homeowners may be given a permit (at no charge) from the Fire Department for use of these appliances.
- The appliance must be made of non-combustible materials (ie: Steel or masonry products) covered with a suitable steel wire mesh which has 6mm (1/4 inch) openings.
- The appliance must be located at least 3 metres (10 ft) from any combustible materials. This would include structures, fences, combustible patios and decks, trees and other vegetation such as un-mowed grass. This distance **may be** decreased if the appliance has been tested by a recognized testing agency, and the required distance is marked on the appliance or is available in the owner’s manual.
- In the case of rental property, a letter from the owner must be received, stating that the owner is aware of the use of the appliance and that they have no objections.
- For Military Residential Housing Units under the jurisdiction of the Canadian Forces Housing Authority **NO** outdoor fireplaces are permitted at all.
- There shall not be any burning or refuse (garbage etc.), petroleum products (gasoline, oil) or materials, which create large amounts of smoke, at any time.
- The home owner shall not burn at any time that the Department of Natural Resources cancels outdoor burning due to extreme fire conditions.
